**LABEL*lab*® 9600Ki… The most powerful, versatile and full-featured Electronic Labeling System, ever.**

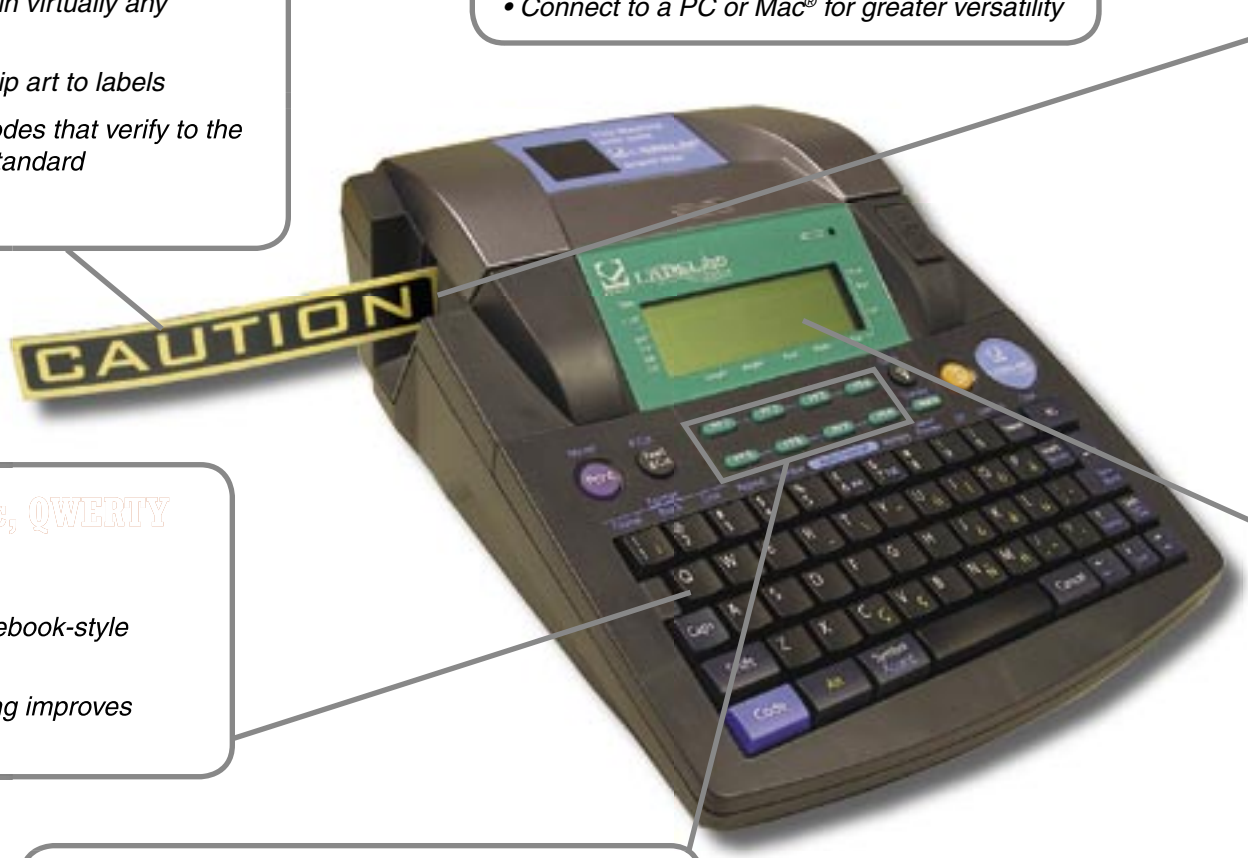
# Produce INDUSTRIAL quality laminated labels anytime, anywhere.

## 360 dpi High-Resolution Printing

- *Print crisp text in virtually any TrueType® font*
- *Add logos or clip art to labels*
- *Produce bar codes that verify to the ANSI x3.182 standard*
- *Rotated text*

## Use Anywhere… At the office. On the factory floor. In the field.

- *Keyboard/display for stand-alone operation*
- *Connect to a PC or Mac® for greater versatility*



## Ergonomic, QWERTY Keyboard

- *Familiar, notebook-style keyboard*
- *Quicker typing improves productivity*

## Programmable Function Keys

- *Download computer designed label templates*
- *Download logos, clip art and graphic files as new symbols*
- *Download database files linked to computer-designed labels*

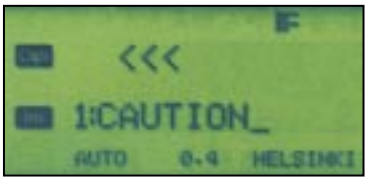
## Portable and Rugged

- *AC adapter & rechargeable Ni-MH battery pack (included)*
- *Can be used in protective carrying case (included)*

## Industrial-Strength Tape Cutter

- *Makes crack and peel labels for higher efficiency*
- *Prints labels one at a time or in strips, supporting diverse labeling needs*
- *New cutter makes smaller margins possible*

## Easy-View Backlit Display



Photos shown actual size.

- *Large display shows more text without scrolling*
- *Backlit for easy viewing in dark areas.*
- *Display icons keep you informed about your label design*
- *"Preview" before printing saves time and money*

# Uses the widest variety of label media

- All K-Sun LABEL*lab*® tape cassettes
- NEW INDUSTRIAL TAPES with up to 2X the adhesive strength of standard tape cassettes

## K-SUN LABEL*lab*® LAMINATED TAPES

Standard laminated tapes available in many colors and sizes

## K-SUN LABEL*lab*® NEW INDUSTRIAL LAMINATED TAPES

Twice the adhesive strength of standard tapes

**Industrial Laminated Tapes** — Do the job right the first time. Made with an industrial adhesive that is twice as strong as our standard adhesive, industrial tape is designed to stick to difficult surfaces that exceed the performance of other brand labels. Industrial tapes are also laminated to protect against abrasion, extreme temperatures, chemical exposures and fading.

| | | | | | | |

# Whatever industry you're in, whatever heavy-duty application you have, the 9600Ki Electronic Labeling System can handle your needs.

### Electrical and Telecommunications

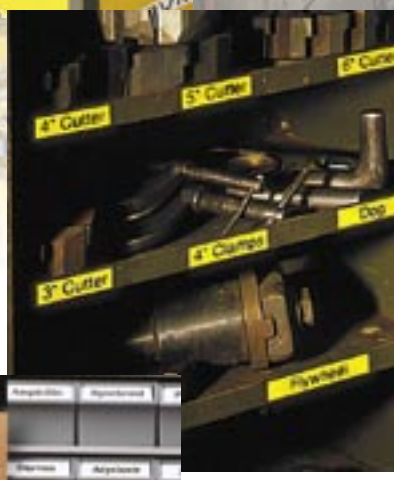
Before you send your workers into the field, download all the data, text, templates and graphics for the labels they'll need into the 9600Ki. Out in the field, they can use the programmable function keys to access the stored files, use the automatic cutter to produce crack and peel labels one at a time or in strips, and use the automatic sequential numbering feature to save valuable time. Perfect for patch panels, faceplates, cable, and wire. The large backlit display makes it easy to see even in the darkest of building spaces.

### Asset Management, Security and Equipment Labels

Preload critical database information into the 9600Ki 8MB of flash RAM, and produce ANSI x3.182-compliant bar codes on laminated crack and peel labels one at a time or in strips for easy application. You can also create and print unique equipment, bar code labels or our special tamper-evident labels (which leave a distinctive pattern if removal is attempted) directly from the 9600Ki in stand-alone mode while operating on its rechargeable battery pack. Tagging and keeping track of valuable assets has never been easier or more efficient.

### Plant Maintenance, Safety and Repair Operations

The portability and durability of the 9600Ki – and our labels' ability to withstand even the harshest environments – make plant maintenance labeling chores easier, and more reliable than ever before. Use our industrial adhesive tapes – with up to twice the strength of our standard laminated labels – you can produce labels that stick and stay stuck to even the most challenging surfaces, like rough, textured and uneven surfaces and curved materials. And all of our laminated labels are highly resistant to dirt, grease, grime, and common industrial solvents, like acetone.



### Laboratory, Hospital and Pharmaceutical Labels

Track batches throughout your manufacturing and distribution processes using the 9600Ki bar code printing and other built-in features like a real-time clock/calendar for auto date and time stamping, automatic sequencing (alpha and numeric) printing, and its ability to use downloaded information from your database. The rugged, reliable laminated labels it produces are waterproof, and resist fading, common lab solvents and abrasion, so your text and graphics remain clearly readable on cabinets, bottles, tubes, shelves, test equipment and folders.

# The K-Sun LABEL*lab*® 9600Ki Electronic Labeling System is the rugged, reliable, heavy-duty answer for all your commercial and industrial labeling needs.

The 9600Ki Electronic Labeling System is an incredibly versatile work horse. It can print on our full line of standard tapes – with the widest selection of colors and sizes – and our Industrial Adhesive Tapes. And it's designed for years of reliable, trouble-free operation.

It operates as a complete stand-alone high-volume label maker, powered either by the included AC adaptor or the included rechargeable battery pack. It also connects to your PC or Mac for even more capabilities.

In stand-alone mode, the ergonomic notebook-style keyboard and large backlit LCD display make entering your text easy and comfortable. A wide variety of built-in fonts and type styles, plus built-in library or bar code symbologies and industrial and commercial symbols make this the most full featured system we've ever made.

When connected to your PC or Mac, via the included USB cable, you can use the 9600Ki like a printer and include custom graphics, any TrueType® fonts, and have even greater control over the appearance of your labels. Using your computer, you can also print from your database, and download database data or up to 100 label designs into its 8MB of built-in flash RAM. You can also download logos, clip art, and graphic files as new symbols.

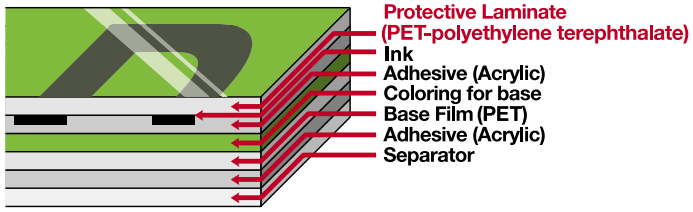
The 9600Ki programmable function keys allow you to make accessing these downloaded files in the field or on the plant floor very simple and turn otherwise time-consuming processes into more efficient "one-button" execution.

The power, performance and innovative features of the 9600Ki can make every labeling task in your office, plant or in the field easier to perform.

# Print durable high-resolution crack-and-peel labels, one at a time or in strips. Print bar codes, symbols, and text on labels from 1/4" to 1 1/2" high.

The 9600Ki prints durable laminated crack-and-peel labels – with laser-quality 360 dpi resolution – one at a time, or in strips. You can print labels in practically any length, and in widths from .25" to 1.5". With the widest tape, labels can carry up to 16 lines of text, or a single line up to 1.1" high, and include graphics and bar codes.

Changing tape styles, sizes and colors to get the precise label you want is as easy as removing and replacing the interchangeable tape cassettes. The cassette you remove can be reused again and again until its tape supply is exhausted.



**INDUSTRIAL TAPE**

The labels you produce with the 9600Ki feature our exclusive, patented labeling technology – where the printing is actually under a layer of clear protective laminate.

This means the text, graphics and bar codes under that laminate are protected from water, grease, dirt, abrasion, fading and almost anything your workplace or Mother Nature can subject that label to. All that makes LABEL*lab*® labels ideal for even the harshest environments – and in the commercial and industrial applications you have, that's about the norm.

With our Industrial Tape – available in black on white, clear or yellow – you can achieve a new level of performance. The labels from these laminated tapes, available in a variety of widths, yield up to twice the adhesive strength of our standard labels, making them ideal for even more demanding labeling applications like textured, rough, uneven and curved surfaces, and outside corners.

The 9600Ki delivers the ability to produce these exceptional labels anytime, anywhere.

# LABEL*lab*® 9600Ki Specifications

## Printing features

- Crisp, professional-quality 360 dpi printing of text and graphics
- Prints durable laminated labels from 1/4" to 1 1/2" wide
- Prints from a database, either using software or downloaded into memory (*.mdb, *.csv)
- Prints 1 line 91 point size (1.1") or up to 16 lines (on widest tape)
- Prints multiple easy-to-remove crack and peel labels on a strip
- Smaller 0.08" (2mm) size margins for virtually "edge to edge" printing
- Built-in real time clock and calendar for auto date and time printing
- Repeat printing up to 999 copies
- Automatically sequences alpha-numerically (1-999, A-Z, a-z)
- Prints from Windows®/Macintosh® drivers, programmable codes and ASCII data

## Label design features

- Auto font size or choose from 25 built-in sizes
- Easy to use label design software imports standard graphic file formats
- Download up to 8 sophisticated label designs from a computer into memory
- Select from 10 internal fonts in 12 different styles (or TrueType® using software)
- 9 resident (14 using software) bar code symbologies
- Large industrial and commercial symbols library
- Mirror image or rotate characters or lines (up to 25 characters) by 90°
- 8MB built-in flash RAM memory; stores up to 100 label designs

## Ease-of-use features

- Large, ergonomic, notebook-style touch-type keyboard
- Large 20 character by 3 line backlit display
- Built-in automatic cutter (makes crack and peel labels)
- Uses LABEL*lab*® laminated and Industrial Adhesive Laminated Tapes
- Includes USB and RS-232C serial interfaces for connection to a computer
- Compatible with Windows® 2000/ME/98/98 SE/XP and Mac® OS 8.6 or later (currently not compatible with OS 10.2)
- Automatic power shut off

## Kit contents

- 9600Ki Labeling System
- Protective Carrying Case
- Rechargeable Battery (Ni-MH) Pack
- AC Adapter/Charger
- USB Cable
- CD (Label Design Software and Drivers)
- One 1" Black on White Laminated Tape
- One 3/4" Industrial Adhesive Tape
- User manual

## Specifications

- Powered by Rechargeable Battery or AC Adapter (included)
- One Year Limited Warranty
- Unit Dimensions: 9.3"(w) x 4.1"(h) x 11.9"(d)
- Unit Weight: 2.18Kg / 4.8 lbs. (without tape)

## System requirements

**IBM® PC or compatible computer**
- Pre-installed with Microsoft® Windows® 2000/Me/98/98 SE/XP
- USB Interface Port
- 20MB available hard disk space (up to 100MB for printing)
- 64MB minimum RAM memory

**Macintosh® computer with Power PC processor**
**Macintosh® OS 8.6 or later (currently not compatible with OS 10.2)**
- USB Interface Port
- 20MB available hard disk space (up to 100MB for printing)
- 32MB minimum RAM memory
